Subcommittee F3 Helicopter Chairman Report 2018

According to my announcement from last year, I have increased the number of S/C members by inviting the Technical Experts from Ireland and the Philippines. Four members wanted to resign and for three of them I found a successor. So, the F3CN subcommittee consists of 19 members. Still most of the S/C members are more involved in F3C than in F3N.

Because of the low number of competitors at Continental and World Championships in the class F3C the S/C decided to create a new F3C schedule. Until now the schedule consists of preliminary rounds and final rounds. The new schedule presents also a semi final. This was a lot of work with many proposals, discussions and votes. Now the schedule is fixed and well prepared to present it at the Plenary Meeting 2019.

For the class F3N only a few changes were approved to keep this class attractive.

During the discussions not all S/C members participate. Sometimes less than the half of the members sent me their votes or feedbacks. This situation I have to change for next year.

In 2018 we continued with the successful World Cups in F3C. This year it was the first time that we also arranged World Cups in F3N. Five competitions were held in F3C and two competitions were held in F3N. The number of competitors in F3C was around twenty, in F3N around ten at each World Cup. Because of five World Cups in F3C, next year it will be the first time that F3C take part at the World Cup awarding ceremony at the Plenary Meeting which makes me very proud.

For 2019 again five organisers were found who want to hold a World Cup.

In 2018 no Continental Championship took place due to no offers. For 2019 the World Championships were awarded to Germany.

Best regards

Stefan Wolf
