133 Pilots with at least 1 Point

Pilots with less than 1 point are not listed here and can be found in the attachment.

## Comment

Although it is possible for the Coordinator to check the licences of all pilots for every competition, it is a huge task that should (and to the rules MUST) be performed by the organizers. By submitting the result to the coordinator, the organizer of the competition has to take the responsibility for the correctness of the data and the FAI ID. The Typhoon Race 2017 had a number of 22 pilots, that were

not registered but that appeared in the results table. That is also true for some European competitions and is a time consuming job for the coordinator to rule them out.

Most results are not submitted with the needed FAI-ID, to ensure a correct identification of the competitor, mostly not even correct names (again, Typhoon Race as an example).

So far this is tolerated to ensure that the organizers will continue with their effort to host a competition. All they need is help and the feeling that the FAI supports them.

I propose, that there should be a central entry form for the competitions via the FAI-website. This way the competitor can be sure that only FAI-registered pilots can register for the competition and it would be a nice feature to take work from the organizers and it also ensures, that the results are published in a timely manner.

It could also be used to register the World Cup-Competitions, so the pilots get to know early about the dates and locations.

Susanne Schödel and Markus Haggenev mentioned such a feature during the 2017 plenary meeting and I think it is utterly needed by the community.

Erik Schufmann  
FAI F3F WorldCup Coordinator
