

Stefan Wolf  
Chairman F3CN Subcommittee

12. November 2017

## Subcommittee F3 Helicopter Chairman Report 2017

After my election as new chairman of the F3CN subcommittee on 29th of april I prepared the composition of the subcommittee. The number of S/C members increased from 17 to 18 because I invited the spanish Technical Expert. Most of the S/C members are more involved in F3C than in F3N. This is why I intend to enlarge the subcommittee next year by at least two more members. One from Ireland and one from the Philippines. At the moment it is not necessary to create working groups for the two classes F3C and F3N.

The communication in the subcommittee is done by internet by using a Google Group. This is now changed and we use „Basecamp 2“, which works very fine.

In 2017 we continued with the successful World Cups in F3C. These kind of competition is very well accepted by the pilots. So I am proud to say that four contests were held in Austria, Germany, France an United Kingdom. Next year we start with World Cups also in F3N and increase the number of World Cups for F3C to five.

The 2017 F3CN World Championship was held in Wloclawek/Poland. This was now the fourth time we were guests in Wloclawek. The competition was again well organised only the number of pilots was very low. 40 pilots in F3C and 25 pilots in F3N.

So, the most important task in the subcommittee is to work on ideas and proposals to increase the number of pilots at CCs and WCs and make our sport more attractive again.

Best regards

Stefan Wolf

CIAM Chairman Subcommittee F3 Helicopter
