

CIAM F5 Electric Flight Subcommittee

Annual 2009

The main activities in the view of FAI were the F5B European Championships in Cisnadia, Rumania and the FAI World Cup Events in Austria, Rumania, Italy and Switzerland in the same class. I was personally involved in this four events. Twice as contest director and twice as president of the FAI Jury. S/c members, competitors and team managers had constructive discussions during ECH and later by email concerninmg the introduction of a new glider class for beginners. This class would only consist of the duration and landing part of F5B. But the Watt limiter must be used. The result of this work is a proposal for the coming plenary.
