General information	Very good organized EC. Very good support by the owner of the flying field. Special thanks of course to Emil Giezendanner providing his technical equipment to run the contest. Excelent large flying field, which allowed setting the distance course without having the sun in the course. Flight path crossings of models at duration and landing task with models flying the distance task could be prevented by course layout and positioning of the landing spot. Very good to excellent flying skill of all pilots. Helpers of the Organizer always available at time and familiar with the sport. Good to very good accomodation for jury members and teams. Good to very good and various food at accomodation and flying field. Catering at the flying field much better compared to F5B WC 2008 and 2006. Two chemical toiletts available at the flying field.
