

Report International Chief Judge – Spain, Castellon 2012

Jiri Dodal – President International Jury everything in his report already described.

I was the international chief judge and tried to organize the work of local and international judges on this event.

The maps were good quality.

The practice navigation tests were available.

The flight instructions before Championships were good prepare and all were checked independent by three person.

We decided to execute the two landings after each navigation stage.

With the involvement of many peoples the championships was held at the highest level.

They were very difficult competition and sparked a debate about the need to change the rules.

I will return to this discussion in my rally subcommittee report.

My personal thanks and congratulations to the entire staff in Castellon, especially to the Competition Director Jesus Mas, Pedro Cabanero and Juan Ramon Alvarez

Thanks to the Jury for their help and good co-operation. Many thanks to the international Judges and the local judges especially for landing team with Chief Landing Judge Jack Jacobs from South Africa and to all the honorary helpers from the Spain for their work and for the friendly agreement.

International Chief Judge
