Proposals for changes to competition rules AE 2004

General:

- 5.2. Add: "this draw can be done by the Chief Judge before the team captains meeting".
The reason is that it takes a lot of time and it is not really necessary for the teams to be present.
- 5.5.3.1. Insert: ", valid both for the male and female categories, ".
There will be only one draw per event, valid both for the male and female categories.
- 5.7.1. Add: "the Performer is not allowed to carry a video camera during the competition jumps. Failure to meet this requirement will lead to a score of 0 points".
This is necessary to make sure before the jump who is the Performer and who is the Videographer, as only 1 recording can be dubbed and judged.
- 5.7.2. Add: "the camera must be fixed static to the helmet. No roll, pitch or yaw movements of the camera, zoom or any possible digital effect may be used during competition jumps. Failure to meet any of those requirements will lead to a score of 0 points.
The camera should not be able to rotate or move during the competition jumps, and no zoom and/or digital effects are to be allowed.
- 5.7.6.3. Change number to: 5.7.7. (*housekeeping*)
- 5.10.1. 3 points: Add: "and/or not meeting one or more of the performance requirements, and/or not having a static start or static stop".
This was already stated in the March bulletin 2001.
- 5.10.2. Change to: "The Judges will only score the compulsory sequences they recognise in the drawn order. If an attempt is made for a compulsory sequence (like a static start) and the Judges recognise this as such scoring will start. A second attempt will receive 0 points."
This was already stated in the March bulletin 2001.
- 5.15.1. Change: "Each Team in each event will be given the option of one (1) official training jump prior to ~~the first competition jump~~ the draw. It is the Teams responsibility to make this jump." The aircraft type and configuration, "plus the judging and scoring systems" to be used in the competition will be used for the official training jump.
- Addendum B B 6, change to: "Diagonal orientation".
Diagonal flying is any angle between 1° and 89°. The angles can be united into 3 major groups:
- "flat diagonal", angle between 70° - 85°
 - "atmonauti", angle between 45° - 65°
 - "flock", angle between 10° - 25°

Freeflying

- 5.12.1. Delete entirely.
- 5.12.2. Compulsory Rounds (round 2, 4 and 6).
The old compulsory (control) is deleted, now 3 speed rounds will be introduced, leaving 4 free rounds, in the following order: F – C – F – C – F – C – F .
- Addendum A Delete: "Loose exit requirement".
This is no longer necessary, as there will be speed rounds only.

Subject:	Artistic Events Rules Changes		Annex:	21

Date:		Repl. doc. dated / version:	N/A	Page 2 of 2

Add: "For the head-up orientation, the legs can be between sit and stand-up (layout) positions.

This is deemed acceptable, and in line with the purpose of the speed compulsories freeflying.

For the pool of compulsory moves, there will be no more difference between random and blocks. All moves will be used, a total of 15 freeflying moves will be published at the IPC Meeting 2004.

More moves are needed as there will be 3 compulsory rounds.

Addendum A Records Sporting Code

Add: "For the largest formation records, grips can be taken on specified body parts. These body parts from Addendum A: freeflying are united into 3 groups, as follows:

- Arm: the whole arm, including upper arm, lower arm, wrist and hand. The shoulder is excluded.
- Leg: the whole leg, including the upper leg, knee, lower leg and foot.
- Body: the body, including the shoulder, and parachute, but excluding the head and neck".

Addendum A Add compulsory move: "Double Sit to Feet Dock".

Both Performers are in a head-up orientation, facing each other.

One Performer demonstrates a two-handed, hand-to-feet dock facing each other. The left hand must be on the right foot of the other Performer, the right hand must be on the left foot of the other Performer.

As promised in bulletin #15.

Freestyle & Skysurfing

Addenda A: reduction from 10 to 8 compulsory sequences. Make compulsories easier.

These will be published at the IPC Meeting 2004.
