1. Proposal dates

- July 12th – July 22nd

2. Location

The planned location is Santa Cruz airfield (LPSC), Portugal, 60km North-West of Lisbon. It's an unique airfield due to its proximity to the capital, surrounding shoreline with beautiful beaches and amazing landscapes.

The Aerodrome is located around 500m south of Santa Cruz Village, and walking distance from the beach. This aerodrome was the stage of the biggest Air Sport Event in Portugal this year, 2011, named Santa Cruz Air Race 2011. Webpage: www.santacruzairrace.com.

It's only civil aerodrome in Portugal, with two parallel runways, asphalt and hard soil surface, at sea level. All facilities for the championship competitors and crew are located on the airfield and the accommodation is nearby.

According to previous experience with intensive aerobatic training camps and Santa Cruz Air Race there should not be any noise complaints from surrounding settlements.

3. Box position

Box will be situated 500m South-West of the airfield runway. Emergency strip inside the box will be established and marked during the competition and training flights. Diagram of the box and flying procedures is on the following image.

Ground radio communication will be established using repeater station to provide good communication channel between the judging line and airport. Air-band high power/gain radio stations will be used to provide safe communication channel between the judging line and competitor.
