2003 Report

The F3C R/C Helicopter Subcommittee (S/C) has 24 members with 20 members having email addresses listed on the FAI web site.

The following documents were circulated via email:

- 1) F3C Technical Meeting report
- 2) World Championship (WC) - Noto, Japan S/C meeting report
- 3) WC FAI Jury report
- 4) WC Scoring Analysis Notes
 - a. 2003 WC Preliminary rounds spread sheet
 - b. 2003 WC Fly-off rounds spread sheet

The main discussion within the F3C S/C during the past year focused on generating new manoeuvre schedules for VOLUME F3C of the 2006 FAI Sporting Code. Due to the situation a crisis developed with regard to last minute replacement of judges at the WC Japan. Based on the fact that we now utilize ten FAI judges at our WCs, the F3C S/C recommends an increase in reserve judges from three to five for future World Championships. The scoring analysis for the 2003 WC indicated significant national bias on the part of the same judge who demonstrated bias at the 2002 Continental Championships. It is recommended that this judge not be selected as a primary judge for future ECs or WCs.
