1st FAI WORLD CHAMPIONSHIPS 2015

PRAGUE | CZECH REPUBLIC

Hurricane Factory Prague Facilities

Hurricane Factory Prague has a wind tunnel with a flying chamber with diameter of 14 feet (4.3 meters) and height of 45.9 feet (14 meters). Flight chamber is round and the high of the glass part is 19.7 feet (6 meters). The door of an antechamber is able to open and close during the flight, which maximizes efficiency of flight time. The tunnel is capable of speeds of up to 280 km/h. The airspeed will be set according to the competition rules.

Hurricane Factory Prague has a state of the art wind tunnel offering the newest technology in indoor skydiving. The facility consists of two buildings – one with 2 floors and one with 3 floors and includes many multi-purpose rooms and large Italian restaurant. The Organiser will rent large sports hall just opposite the tunnel building.

Registration will be conducted at the reception equipped with five networked computers and a fully integrated, modern, and customized system capable of handling all accounting and tracking. There is ample registration and counter space as well as numerous telephones and printers.

Judging panels will be housed in a large conference room on the first floor with ample space for the judging team, video playback monitors, printer and other supplies. An electronic image dubbing area should not be necessary as all flight chamber video is immediately transferred to a video server from which the files can be accessed or transferred.

There are many networked computers and printers located throughout the building that are accessible to competition staff.

There will be many areas setup for competitor use. Two large changing rooms on the 1st floor of tunnel building will be dedicated to competitor creeping and dirt dives. The restaurant on the 2nd floor of office building will be setup as a competitor lounge area. There will also be space for competitors to relax (terrace with jacuzzi on the 3rd floor) and view video in the class and team rooms. Bulletin boards will be setup on the reception and in other areas where easily accessible to all competitors.

The building is equipped with 12 public toilets including both men's and women's facilities. There are a drinking fountain and food and beverage vending machines on the second floor of tunnel building.

Hurricane Factory Prague is located in the North of Prague and it is right next to a shopping center with many restaurants and shops.
