

CIVA Catalogue Committee Report 2016

Agenda Item 10.3

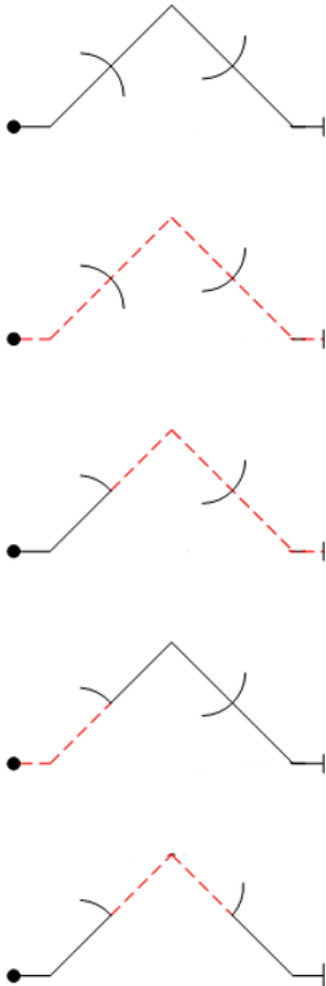

A single proposal from Sweden has been submitted to the Catalogue Committee for 2016.

Proposal

Introduce new Figure Family

The Catalogue Committee should consider introducing figures as shown below as a sub-family under Family 1.

Examples:

Comments

Committee Members were invited to comment on the proposal and the prevailing opinion was that the addition of these figures to the Aresti catalogue would not offer a significant enrichment to the existing choice of figures. These figures would cover much "ground" in the Box and for aerobatic aeroplanes with their significantly higher speeds compared to gliders, it would be virtually impossible to stay within the Box. Although this would be less of a problem for gliders, again these figures were not considered a worthwhile addition to the glider catalogue.

Recommendation

The Catalogue Committee does not recommend to add the proposed figures neither to the Power nor the Glider Catalogue.

Manfred Echter
Chairman, Catalogue Committee
October 2016
