

2019 Interim Bureau Decisions

DATE	IBD No.	SUBJECT	DECISION
07/05/2019	2019/04	<p>The IPC Bureau received a request from the Wingsuit Committee to alter the way the Speed task is scored from the current meters per second m/s, to kilometres per hour km/h.</p> <p>The committee explained that since the conception of the discipline and the speed task, (long before it was adopted as an official FAI FCE) the unit of measurement has always been km/h. To alter it now could cause confusion for everyone.</p> <p>The committee point out that Speed Skydiving CRs also uses the same (km/h) as the unit of measurement.</p>	<p>The IPC Bureau believed that in the interest of continued understanding of the scoring system and so as not to cause confusion they agreed to the request of the committee.</p> <p>The 2019 Wingsuit Flying Competition Rules will include the following:</p> <p>6.1.2. All official Speed task scores will be scored and displayed in kilometres per hour (km/h).</p>
