

FAI SPORTING CODE

Section 3 – Gliding

Annex D

Rules for the Official IGC Pilot Ranking List

2024 Edition

Effective 1 January 2025

Ver. 2024a, 08 December 2024

RIGHTS TO FAI INTERNATIONAL SPORTING EVENTS

All international sporting events organised wholly or partly under the rules of the Fédération Aéronautique Internationale (FAI) Sporting Code¹ are termed *FAI International Sporting Events*². Under the FAI Statutes³, FAI owns and controls all rights relating to FAI International Sporting Events. FAI Members⁴ shall, within their national territories⁵, enforce FAI ownership of FAI International Sporting Events and require them to be registered in the FAI Sporting Calendar⁶.

An event organiser who wishes to exploit rights to any commercial activity at such events shall seek prior agreement with FAI. The rights owned by FAI which may, by agreement, be transferred to event organisers include, but are not limited to advertising at or for FAI events, use of the event name or logo for merchandising purposes and use of any sound, image, program and/or data, whether recorded electronically or otherwise or transmitted in real time. This includes specifically all rights to the use of any material, electronic or other, including software, that forms part of any method or system for judging, scoring, performance evaluation or information utilised in any FAI International Sporting Event⁷.

Each FAI Air Sport Commission⁸ may negotiate agreements, with FAI Members or other entities authorised by the appropriate FAI Member, for the transfer of all or parts of the rights to any FAI International Sporting Event (except World Air Games events⁹) in the discipline¹⁰, for which it is responsible¹¹ or waive the rights. Any such agreement or waiver, after approval by the appropriate Air Sport Commission President, shall be signed by FAI Officers¹².

Any person or legal entity that accepts responsibility for organising an FAI Sporting Event, whether or not by written agreement, in doing so also accepts the proprietary rights of FAI as stated above. Where no transfer of rights has been agreed in writing, FAI shall retain all rights to the event. Regardless of any agreement or transfer of rights, FAI shall have, free of charge for its own archival and/or promotional use, full access to any sound and/or visual images of any FAI Sporting Event. The FAI also reserves the right to arrange at its own expense for any and all parts of any event to be recorded.

FAI SPORTING CODE Section 3 – Gliding
Annex D - Rules for the Official IGC Pilot Ranking List

2024a EDITION

CHANGE RECORD
(Baseline: rev 2022_2)

Note: Due to the nature of the IGC Ranking List system all changes concerning the actual calculation are applied retroactively also to all previously held championships.

SIGNIFICANT CHANGES

5.5.1 Base Quality Factor of Category 1 events Changed according to decision 6.2.7 from IGC plenary 2023
(introduced: rev. 2024a)

MINOR CHANGES

(spelling errors)

1 DATES AND DEADLINES

The table below describes the “lifecycle” of a Ranking List season:

Date	Description	Explanation
1 October, year “Y-1” 00:00 UTC	RL season year “Y” starts	All championships that <u>end</u> between these two dates belong to the RL season of year “Y”.
30 September, year “Y” 24:00 UTC	RL season year “Y” ends	
24 October, year “Y” 24:00 UTC	Registration period for events of year “Y” ends	All championships that are to be ranked in the RL season of year “Y” must be registered at the IGC RL website latest by that date and time. <i>Later registrations are invalid, any fee for a late registration will be forfeit.</i>
31 October, year “Y” 24:00 UTC	Results submission period for events of year “Y” ends	All results for an event registered for RL season year “Y” must have been submitted in an acceptable form to the RL team at the latest by that date and time. <i>Later submissions are invalid, any registration fee already paid will be forfeit.</i>
8 November, year “Y” 00:00 UTC	Preliminary ranking for RL season of year “Y” published	At the latest by this date and time the RL team publishes the preliminary rankings for RL season of year “Y”. <i>Depending on the backlog this might also happen earlier, beginning on 1 November, year “Y” 00:00 UTC.</i>
31 December, year “Y” 24:00 UTC	Request for adjustment period for RL season of year “Y” ends	Any request for adjustment of the preliminary results for RL season of year “Y” must have been made by that date and time in order to be considered in the final ranking. <i>Later submissions will still be processed and will affect the rankings in future RL seasons, but the final rankings of RL season year “Y” will not be re-calculated, unless ordered by the IGC Bureau or FAI.</i>
8 January, year “Y+1” 00:00 UTC	Final ranking for RL season of year “Y” published	At the latest by this date and time the RL team publishes the final rankings for RL season of year “Y”. <i>Depending on the backlog this might also happen earlier, beginning on 1 January, year “Y+1” 00:00 UTC.</i>

Note: A Ranking List season is typically described by a year “Y”, but should for clarity’s sake be designated “Y-1/Y”. For example, RL season 2022 ran from October 1st, 2021 to September 30th, 2022 – and should be called “RL season 2021/2022”. Nevertheless, in most communication, as in this document and on most pages of the RL website a season is referred to with one year only.

2 GENERAL

2.1 PURPOSE OF ANNEX

This Annex is published to provide rules and procedures for the Official IGC Pilot Ranking List (hereafter called the "Ranking List"). The Ranking List shall provide a ranking of Individual pilots as well as countries. Published at <http://www.fai.org/gliding/rankings>.

2.2 BACKGROUND

The Ranking List was established in 2001 and became active from January 2003. At the FAI International Gliding Commission (IGC) Plenum meeting held in Lausanne in March 2006, it was decided that, considering the maturity of the Ranking List and rule set driving the Ranking List, it was reasonable to review the existing rule set, and convert them into an Annex to the FAI Sporting Code Section 3, Gliding.

The establishment of a Ranking List for countries was likewise adopted at the meeting in Lausanne in 2006, and has been included in this Annex.

2.3 OBJECTIVES

The objectives of the IGC Official Ranking System are

- to represent as accurately as possible the relative performance of competition pilots from their results in national and international soaring competitions
- to promote soaring competition
- to create a focus for promotion of competitive soaring
- to promote the development of a high quality international competition structure
- to create resources within the IGC to enable them to raise the standard of IGC category 1 soaring competitions and improve contact between the media and Soaring.

The IGC ranking system provides an official seeding list of competition glider pilots participating in International contests and contests sanctioned for inclusion.

The Ranking List is updated after each competition.

The Ranking List has three main components: Competition Rating, Pilot Rating and Country Scores.

- The Competition Rating depends on the type of competition, the quality of the pilots competing and the number of competition days.
- The Pilots Rating is the result of their performance in IGC sanctioned competitions. It is calculated using their personal score relative to that of the winner's and the Competition Rating.
- A Country's Score is based on the average of the 5 highest ranked pilots of that country.

3 SANCTIONED COMPETITIONS

3.1 CATEGORY 1 EVENTS

All IGC category 1 events i.e. World and Continental Championships and Sailplane Grand Prix Finals are automatically included in the Ranking List as category 1 events.

3.2 CATEGORY 2 EVENTS

The results of other international competitions or national championships may also be included in the Ranking List under the following conditions.

They must be organised with the authorization of the relevant National Aero Club (NAC).

They must be approved by the IGC and pay the appropriate sanction fee.

In Nationals Championships, only the results of pilots holding a valid FAI Sporting Licence can be taken into account.

Qualifying Sailplane Grand Prix contests, also rated as Category 2 events, are automatically included in the Ranking List.

3.3 COMPETITION SANCTION FEE

The competition sanction fees will be paid according to the conditions referred to on the Ranking List web page "Enter Competition".

The levels of Sanction fees are determined by the IGC bureau.

4 RANKING LIST MANAGEMENT AND ADMINISTRATION

4.1 MANAGEMENT

The Ranking List is managed and administrated by an IGC Ranking List Manager and an IGC Ranking List Administrator.

The IGC Ranking List Manager is responsible to the IGC for the satisfactory operation of the Ranking List. Comments, complaints or queries about any of the items below shall be directed to the IGC Ranking List Manager:

- Queries regarding the rules, or how the system works;
- Queries relating to your position in the Ranking List;
- Registration of a competition for inclusion in the Ranking List.

Amendment of pilot or competition details shall be directed to the IGC Ranking List Administrator.

Contact details can be found at the FAI/IGC web site.

4.2 INCLUSION OF COMPETITION RESULTS

(The exact time of all deadlines stated below is 24:00:00 UTC if not stated otherwise.)

A Ranking List season runs from October 1st of the previous year to September 30th of the current year. It is the date of the last competition day as scheduled at the first day of the championship that determines the season.

Example: Competition Season 2019 runs from October 1st, 2018 to September 30th, 2019. A championship with the first competition day on September 26th, 2019 and the last scheduled competition day on October 2nd, 2019 thus belongs to the new season 2020. This is also the case if the last two competition days had to be cancelled and the championship in practice ended prematurely on September 30th, 2019. Furthermore, this is also the case if the competition organizers cancelled the last two competition days in advance (though after the first day of the championship) and rescheduled the awards ceremony to be held two days earlier, on September 30th. If the organizers moved the last competition day to September 30th before the first day of the championship (= September 26th in this example), i.e. rescheduling of the championship was made before it officially started, the championship in question then belongs to the old season 2019.

A championship must be registered with the Ranking List at the latest by October 24th in order to still be allowed for ranking in the previous RL season.

Example: A championship for inclusion in the RL season 2019 (running from October 1st, 2018 to September 30th, 2019) must be registered and paid for no later than October 24th, 2019. Any registration later than that will be invalid and the fee be forfeit.

Note: Having registered an event in time still necessitates the timely submission of the results, in the example above no later than October 31st, 2019.

4.2.1 SUBMISSION OF RESULTS

The Competition Organizer is responsible for the provision of the final results from the competition.

Results should be submitted within 15 days of the completion of the competition in one of the formats specified on the Ranking List webpage if not otherwise agreed with the Ranking List team.

As a Competition Season runs from October 1st of the previous year to September 30th of the current year, results shall be submitted for inclusion no later than October 31st. Later submissions will not be uploaded and the fee paid will be forfeited.

Example: Competition Season 2019 runs from October 1st, 2018 to September 30th, 2019. Results for any gliding event of the Competition Season 2019 are to be submitted no later than October 31st, 2019.

Results shall include every competitor's Ranking List Identifier, otherwise they are regarded as incomplete and returned to the Competition Organizer for adjustment.

Note: The submission deadline above applies to the complete result, i.e. submitting results without RL-ids, thus incomplete results before October 31st but then failing to submit adjusted results before that date means that the deadline has not been met and the results are not eligible for inclusion.

Note 2: Publication of competition results on public web pages must be complemented by sending a web link to the RL team and explaining which result set matches the classes registered at the RL webpage.

Example of an unacceptable submission: An event is registered (in time) as "XX National Gliding Championship" with the classes "Club" and "Combi" on the RL website but the organizer fails to point out to the RL team where the results can be found. On a well-known public internet page one finds "YY.Majstrovstvá SR v bezmotorovom lietaní 20ZZ" with three classes "Klubová trieda", "Kombinovaná A trieda", "Kombinovaná A&B trieda". The RL team cannot be expected to determine whether this is the results set for the event in question, whether the results are ready to upload and which two of the three classes named in a different language than English match the two classes registered at the RL website. If the organizer does not contact the RL team with these information prior to October 31st the results are no longer eligible for upload and the registration fee for the event in question is forfeit.

If a pilot is not previously registered in the Ranking List, his/her Ranking List identifier can be obtained by registering the pilot on the RL web site.

The Ranking List will normally be updated not later than one week after the reception of the results. In urgent cases the RL team can be contacted to upload results sooner.

Final rankings for the recent Competition Season will be calculated and published based on the data included in the Ranking List on December 31st. Preliminary Final Rankings will be calculated and published at the latest on November 8th 00:00 UTC based on the data included in the Ranking List by October 31st.

Note: Irrespective of the date of calculation only results for events from or prior to the Competition Season to be calculated are included. For calculations after the end of a Competition Season only championships that have ended by the latest on September 30th are considered.

Example: Competition Season 2019 runs from October 1st, 2018, 00:00 UTC to September 30th, 2019, 24:00 UTC. Only results from championships that have ended by the latest on September 30th, 2019, 24:00 UTC are considered in the calculation of rankings for Competition Season 2019.

At the latest by November 8th, 2019 all results must have been uploaded to the RL database (based on results submitted no later than October 31st), after this date no results are allowed for new upload. However, until December 31st, 2019 it is allowed to modify already uploaded results, for example to address wrong pilot IDs.

At the latest on November 8th, 2019 at 00:00 UTC the RL team will calculate and publish Preliminary Final Rankings for the Competition Season 2019. Without this pilots flying in the Southern Hemisphere and producing results for the Competition Season 2020 during the remainder of the Calendar Year 2019 would have to wait for their updated rankings based on the new results until January 1st, 2020.

At the latest on January 8th, 2020 at 00:00 UTC the Final Rankings for the Competition Season 2019 will be calculated and published based on the RL data from December 31st, 2019 – but only including results from championships that have ended no later than September 30th, 2019.

4.2.2 PILOT DETAILS

Basic pilot details such as name and nationality will be taken from the Ranking List. For pilots currently not registered basic details will be taken the material provided by the Competition Organizer. (The pilots Nationality should be given as the country in which his/her sporting licence is issued. IOC Country Codes are to be used).

The pilot can provide additional information directly via the web interface or by contacting the IGC Ranking System Administrator.

4.2.3 CORRECTION OF ERRORS

Results are continuously updated and the pilots are therefore encouraged to regularly check their RL profile.

If there are any errors or omissions the organiser or competing pilot shall contact the RL Administrator with the relevant details at the latest by December 31st of the year the Competition Season's end.

Example: Competition Season 2019 runs from October 1st, 2018 to September 30th, 2019. Requests for correction of errors are to be submitted no later than December 31st, 2019.

Requests for correction of errors after above deadline will still be honoured but the final rankings for the Competition Season concerned will not be updated in retrospect.

Note: This is of concern to pilots who, for example have failed to provide their correct RL-id or have been assigned a newly created RL-id instead of using their pre-existing one. Notifying the RL team of such errors after above deadline means that the final rankings of the Competition Season concerned will not be changed, but the pilot's ranking in the Competition Season currently on-going might be positively affected.

4.2.4 PROCEDURE FOR CORRECTION OF ERRORS

All requests for correction to pilot or competition details shall be made on line via email to the Ranking List Manager or Ranking List Administrator.

In the event of any dispute regarding the entry of a Competition's results or a pilot's details, the organiser or pilot may make a direct appeal to the IGC Bureau who will decide the matter with finality. Any appeal should be made via the IGC secretary.

5 COMPUTATION OF COMPETITION RATING AND PILOT RATING

5.1 OVERVIEW

Both Competition Rating and Pilot Rating are expressed as a number from 0 to 1000. Furthermore, a Quality Factor is defined for each Competition, as a number between 0 and 1.

- The Competition Rating depends on the type of competition and on the quality of the pilots competing.
- The Pilot Rating is the result of his/her performance in sanctioned competitions.
- The Quality Factor depends on the number of competing pilots and the number of competition days. The Quality Factor will reduce with the age of a contest.

5.2 COMPETITION RATING

Each contest can have several qualifying competitions, one for each separately scored class in the contest. For ranking purposes, competitions are divided into the following categories:

- Cat 1+: First Category FAI Competitions such as World Championships in each of the FAI classes and the Sailplane Grand Prix Finals.
- Cat 1 standard: First Category FAI events with restricted entry and continental championships, or any other international event approved by IGC as First Category.

Note: This means that Junior WGC and Women WGC are Cat 1 standard. Definition of these restricted entries is made in Sporting Code 3D Annex A section 1.3.4 "Competitions with restricted entries".

- Cat 2: Any other International Competitions or National Championships sanctioned by the IGC for Ranking List inclusion. All Qualifying Sailplane Grand Prix contests are approved as Category 2 events and automatically included in the Ranking List. For advice on competition approval see chapter 3 "Sanctioned Competitions".

5.3 ACTIVE COMPETITION PERIOD

5.3.1 ACTIVE COMPETITION PERIOD OF CATEGORY 1 EVENTS

For Category 1 events a maximum of two events in a sequence is scored. The active Competition Period is limited by a maximum of 5 years.

5.3.2 ACTIVE COMPETITION PERIOD OF CATEGORY 2 EVENTS

For Category 2 events the active Competition Period is limited by a maximum of 4 years.

5.4 COMPETITION RATING CALCULATION

Competition ratings are calculated using the Pilot Ratings (PR) at the start of the competition of the 5 highest ranked pilots finishing in the top half of a contest by position (number rounded up), or scoring at least 85% of the winners score.

$$\text{Competition_Rating} = 0.1 \times (5 \times \text{Maximum_Rating} + \text{PR1} + \text{PR2} + \text{PR3} + \text{PR4} + \text{PR5} + 100)$$

The Competition Rating is limited within the range appropriate to the Competition category outlined below. A minimum Pilot Rating is also outlined below and will be used in the event that a greater Pilot Rating cannot be achieved by the five highest ranked pilots.

Competition category	Cat 1+	Cat 1 std	Cat 2+
Maximum Rating	1000	980	960
Minimum Rating	960	900	800
Minimum Pilot Rating	900	800	620

Note 1: Any pilot with status DNF (Did Not Fly) every single competition day is to be considered a non-competitor and has to be purged from the list of participants. Pilots with total score of 0 but at least one competition day where the status is other than DNF, for example DNS or a penalty zeroing the day's pilot score, are considered to have taken part in the competition and are thus to be included in the entry list. In any case, no pilot with a total score of 0 will be included in calculation of Competition_Rating anyway due to the boundary conditions stipulated above.

Note 2: The Pilot Ratings used for calculation are from the registered start of the competition (which is not necessarily the first competition day because a day can be cancelled etc.). Please note that Pilot Ratings change all the time due to new results being added and old ones getting devalued. To reflect this in full the IGC Ranking List should be automatically recalculated each day – which is impractical at the moment. Therefore the results as published at a certain date are to be regarded as the official results for that date, even though some changes might occur in case of a recalculation.

Note 3: The number of pilots in the "top half of a contest" being rounded up means that when 15 pilots compete the "top half" is comprised of places 1 to 8.

5.5 COMPETITION QUALITY FACTOR

The maximum Pilot Rating a pilot can achieve from a given competition is limited by the Quality Factor. The Base quality factor reduces with the age of a contest.

$$\text{Quality_Factor} = \text{Base_quality_factor} \times \text{Entry_factor} \times \text{Day_factor}$$

with:

$$\text{Entry_factor} = \min((\text{number of pilots with score} > 0) / 10), 1)$$

$$\text{Day_factor} = \min((\text{number of competition days}) / 4), 1)$$

Note 1: The min(a, b) function calculates the lesser of a and b, putting both factors in the range of 0 to 1.

Note 2: The number of pilots used for the calculation of Entry_factor according to the equation above includes only competitors with a total score >0. Any pilot with zero total score reached through DNF (Did Not Fly) every single competition day is to be considered a non-competitor and has to be purged from the list of participants. Pilots with zero total score but at least one competition day where the status is other than DNF, for example DNS or a penalty zeroing the day's pilot score, are considered to have taken part in the competition and are thus to be included in the list of participants.

Note 3: Any day that had to be cancelled or that subsequently has failed to become a valid competition day according to Annex A has to be removed from the result data set prior to submission to the RL team. Only day results from valid competition days are allowed to be submitted.

Note 4: In the algorithmic implementation of below scheme for devaluation of each competition's Base_quality_factor it is assumed that 1 year = 365 days and further that 3 months = ¼ year = 91.25 days. Calculating with actual calendar years and calendar months would have complicated the calculation without yielding any significant benefit.

5.5.1 BASE QUALITY FACTOR OF CATEGORY 1 EVENTS

Base_quality_factor	All Cat 1 events
From end of event until 2 ¼ years after	0.80
From 2 ¼ years after end of event until 3 ¼ years after	0.50
From 3 ¼ years after end of event until 4 ¼ years after	0.40
From 4 ¼ years after end of event	0

5.5.2 BASE QUALITY FACTOR OF CATEGORY 2 EVENTS

Base_quality_factor	Cat 2
From end of event until 1 ¼ year after	0.60
Reduction per year, starting 1 ¼ year after the end of the event	0.15

5.6 PILOT RATING SCORE

All eligible competing pilots in a sanctioned competition will receive a Pilot Rating Score from that competition.

In the case of multi-seat gliders a Pilot Rating Score will be determined for only one of the pilots, regardless of glider class. The pilot receiving the Rating Score will be the pilot with the highest Pilot Ranking at the start of the competition, designated as first pilot or P1. If neither pilot has a current ranking the Rating Score is awarded to the pilot nominated as P1. It is always the responsibility of the Competition Organizer to determine the pilot to whom the Rating Score shall be attributed and clearly state her/him as P1 in the result list. This pilot needs to fly all valid days of the competition.

Note 1: Since competitions can be held consecutively and the submission of results from prior contests might be delayed a situation can arise where the pilot pointed out as P1 in the beginning of the competition in retrospect has had a lower ranking as the P2. In any such case P1 shall be the pilot having the higher ranking in the RL as published 00:00:00 UTC on the first day of the competition (with first day being the first calendar day where flying could have been scheduled). It is recommended that the Competition Organizer saves a snapshot of the Ranking List or for the pilots in question in order to provide proof in case of later complaints. The RL team also provides the functionality for such snapshot. Please note that Pilot Ratings change all the time due to new results being added and old ones getting devalued. To reflect this in full the IGC Ranking List should be automatically recalculated each day – which is

impractical at the moment. Therefore the results as published at a certain date are to be regarded as the official results for that date, even though some changes might occur in case of a recalculation.

Note 2: In the FAI 20m Multi-seat class in Cat 1 events the team must consist of the same pilots throughout the competition and both pilots need to fly each competition day. In Cat 2 events of that class and in events in other classes it is possible to have a team consisting of a P1 who flies all days of the competitions and multiple P2's (even as far as having a new P2 each day) as long as each P2 has lower ranking than the P1. If at any day throughout the competition a P2 has a higher ranking than the designated P1 the original team's performance is to be set to "DNF" (Did Not Fly) that day and a new team, flying the same plane, is to be created, consisting of the originally designated P1 but in this new constellation considered P2 due to his/her lower ranking, and the newly added, higher ranked other pilot designated as P1. This new team is to be added as a full competitor, receiving day score for the days flown in this specific combination of P1+P2 and "DNF" otherwise.

Alternatively, if all pilots designated as P1 throughout the competition choose to forfeit their ranking points they can be assigned to a newly created generic pilot, for example named "(team)", with status set to "HC" and "deceased" so that this generic pilot can never be reused. In such case the IGC Ranking List team must be notified as this alternative involves manual intervention. For the RL team this is the default solution unless advised to the contrary.

Note 3: Teams sharing single seaters are not allowed. Such constellations are to be broken up as described above, i.e. each pilot is regarded as an entry with a score for days flown and "DNF" on days when the glider has been flown by someone else.

The competition winner's Pilot Rating Score is equal to the competition's Competition Rating. All the other competing pilots receive a Rating Score proportional to their final scores.

$$\text{Pilot_Rating_Score} = \text{Competition_Rating} \times \text{Pilot_Score} / \text{Winner's_Score}$$

5.7 PILOT RATING CALCULATION

The Pilot Rating is calculated from the best Pilot Rating Scores achieved, taking into account the Competitions Quality Factors.

Keep the best two Cat 1 competitions (those which yield pilot the best Pilot Rating Score). Discard all others based on Cat 1 competitions. Keep all Cat 2 Competitions without any number limitation.

Add a "virtual competition" whose Pilot Rating Score is pilot's best Pilot Rating Score minus 200, with a Quality Factor of 1.

Sort all pilot's Pilot Rating Scores by decreasing order.

Add the pilot's Pilot Rating Scores multiplied by their Quality Factor together, until the sum of the Quality Factors is at or above 1.

If the sum of Quality Factors is greater than 1, then reduce the last Quality Factor so that the sum of Quality Factors be equal to 1.

If the Virtual Competition was used in this sum, further reduce the last Quality Factor so that the sum of Quality Factors be equal to 0.99, and complete to 1 using the pilots next Rating Score instead of Virtual Competition.

Example: To recap, in order to calculate the ranking points for a pilot, we rate their performance by Pilot Rating Score (PRS) descending. The winner of a comp gets the max PRS and other pilots get a PRS which is a ratio of their points relative to the winners points.

Consider a pilot with results as depicted in the screenshot to the right. This pilot's best performance was in the WGC 2018. This comp was rated at 995.22 points, so the winner received

Rating Points: 990.4					
Latest Competition Results					
Competition	Year	Position	Score	Pilot Rating Score	Rating Points
Nationals	19	1/50	3539	960.00	0.0
European Gliding Championships	19	1/14	3443	980.00	196.0
World Gliding Championships	18	2/48	5723	992.96	794.4
Nationals	18	1/52	3835	960.00	0.0
Nationals	18	1/41	5624	960.00	0.0

a PRS of 995.22. The pilot thus gets the following Rating Points: $5723 / 5736 * 995.22 = 992.96$.

This comp has a quality factor (QF) of 0.8, so the pilot can use 0.8 of the PRS to calculate ranking points. This yields 794.4 ranking points. There are now 0.2 remaining from 1.0 and we use the pilot's next best performance which were the Europeans 2019. The pilot won this comp, but it is rated at 980 points, lower than the WGC 2018. Rating Points: $0.2 * 980 = 196$. Sum: $794.4 + 196.0 = 990.4$ total ranking points.

If this pilots flies no more comps, the WGC 2018 will be reduced to QF 0.6 when WGC 2020 is flown. Then the pilot's total ranking points will reduce to 987.78 ($0.6 * 992.96 = 595.78 + 0.4 * 980 = 392$). As comps get older the amount of QF that pilots can use from them reduces, so newer comps have more relevance.

Note: Pilots who participate as "HC" are treated in the same manner as everyone else when it comes to the IGC Ranking List: they count in calculation of the Competition Rating and they receive Ranking Points for their respective performance. Participating as "HC" only means that the pilot concerned does not receive the official recognition of a place in the final result list for their respective performance due to some formality mismatch, like being of nationality A but participating in country B's Nationals or flying a glider of deviating class (like being allowed to fly with a Two Seater in Standard Class). Their respective performance is still valid and thus generates Ranking Points.

5.8 PILOT RANKING

Pilots are ranked upon decreasing Pilot Rating points. Ties are initially broken by the highest single Pilot Rating Score. If a tie still exists the pilot with the highest Pilot Ranking on the 30th September of the preceding year will take precedence.

6 COUNTRY SCORES

The Ranking List web site will include a Ranking by country. A Country's rating is defined as the average score of the 5 highest ranked pilots of that country. The Country Scores are updated after each contest is included in Ranking List.

Note: If the Ranking List Country Scores are to be used as a filter for entry into a competition, it is necessary to define a specific date on which the List will apply.

7 COMPETITIONS USING THE SAILPLANE GRAND PRIX RULES

7.1 RATING OF SAILPLANE GRAND PRIX

Sailplane Grand Prix World Finals will be rated as Category 1+. Qualifying SGPs will be rated as Category 2. All Grand Prix competitions will be subject to the application of Ranking List calculations as defined in section 5 of these rules to determine their Rating and Quality factor.

7.2 PILOT RATING SCORE

Any pilot with a non-zero Pilot Score in the final result list receives a Converted Pilot Score which is the SGP Pilot Placement converted to a 1000 points system:

$$\text{Converted_Pilot_Score} = \begin{cases} \text{if Pilot_Score} = 0: \\ 0 \\ \text{otherwise:} \\ 1000 - 400 \times (\text{Pilot_Place} - 1) / \text{Number_of_Pilots} \end{cases}$$

Similar to 5.6 the Converted Pilot Score is then used to calculate the Pilot Rating Score:

$$\text{Pilot_Rating_Score} = \text{Competition_Rating} \times \text{Converted_Pilot_Score} / 1000$$

8 COMPETITIONS USING THE E-CONCEPT GLIDING COMPETITION RULES

8.1 RATING OF E-CONCEPT GLIDING COMPETITIONS

All E-Concept gliding competitions will be subject to the application of Ranking List calculations as defined in section 5 of these rules to determine their Rating and Quality factor.

8.2 PILOT RATING SCORE

Any pilot who has made a competition start receives a Converted Pilot Score which is the E-Glide final placement converted to a 1000 points system:

$$\text{Converted_Pilot_Score} = 1000 - 400 \times (\text{Pilot_Place} - 1) / \text{Number_of_Pilots}$$

Similar to 5.6 the Converted Pilot Score is then used to calculate the Pilot Rating Score:

$$\text{Pilot_Rating_Score} = \text{Competition_Rating} \times \text{Converted_Pilot_Score} / 1000$$
